

The Bookplate Journal

First Series Volumes 1 to 20
1983-2002

INDEX OF NAMES **A – D**

This is a cumulative index in digital form of the five printed indexes covering the first series of *The Bookplate Journal* 1983-2002. The printed indexes were created for the most part by volunteers with little or no experience of indexing and the result is a basic unsophisticated tabulation. There is a promiscuous mixture of names of owners, artists, engravers, authors, and odd references to such as William Shakespeare, assorted kings and queens, and various persons who may or may not have relevance to bookplates. Although some indexed names are clearly of no use whatever they have nearly all been retained for the time being. The identity or occupation of those whose names appear in the printed indexes were almost never given. Where these appear in this issue they have been added by me. Such identification can be useful to those who use the index and much more could be done in future to improve the index in that way.

The first of the printed indexes (vols. 1–4) uses initials almost to the exclusion of full given names so that absorbing names from the later indexes became a tedious and time-consuming business with constant reference to the Journals themselves to sort out the identity of an R. Brown or an H. Smith. This identifying of first names has only partly been carried out and some duplicated entries certainly remain in this cumulative list. Errors of various sorts have been corrected when recognised but others remain. Inconsistencies in the alphabetical conventions used in the printed indexes have pretty much survived into the digital listing through sheer lack of time to sort them out. Hopefully they can be dealt with over time. Searchers for a subject with a double-barrelled name are advised to look under both surnames as there is no consistency in their listing.

Creating the cumulative index was a work of many hours and it is to be hoped that it will be of utility to researchers who do not possess the printed indexes and time saving to those who do. Intending contributors to the society's publications will find it indispensable in establishing what has already been said on their subject. It is intended to bring the Bookplate Society Newsletter indexes into a cumulative digital format in due course. The whole content of the society's periodical publishing will then have some form of easy reference.

If users of this index will advise me of any errors or omissions and/or clarifications of entries the necessary corrections will be made and a re-issue of the index sent out from time to time.

Paul Latcham, Editor, *The Bookplate Journal* 2003-

25 June 2007

The volume number appears in bold face and the pagination in ordinary type. An asterisk (*) indicates that the bookplate by or for the said individual or institution is illustrated.

N.B. In Volumes 17, 19 and 20, the pagination starts again at 1 in No.2 (September); for these volumes pages in No. 1 are indicated by **17, 19** and **20**, and in No.2 by **17(2), 19(2)** and **20(2)**.

In Volume **20**, page 63, Portrait of a Bookplate is wrongly numbered 32 (should be 33).

Volume **17(2)** consists entirely of an index to the Viner Collection arranged by artists, with an alphabetical index of about 1000 owners on pp.45-64. The list of owners is not duplicated here, but the 170 artists' names are included.

John Millburn's note refers to vols. **17 –20** only: Unidentified monograms are indexed by the last initial, on the assumption that it represents the surname. [This practice was not followed in the previous four indexes and needs to be corrected. PRL] Monograms and anonymous plates which are identified in the text are indexed under the relevant surname.

Peers are indexed by title and by family surname if this is mentioned in the text, [Again this was not necessarily done in the previous indexes where peers are listed in several different ways. PRL]
fc = front cover (outside); rc = rear cover (inside)
